Practical 10

Aim

A company stores error logs in .txt files on the server. You need to create a tool for developers to view these logs via a browser. Write an Express JS app that reads a text file and shows its content on a web page. Include error handling if the file is missing or inaccessible. This helps developers debug without accessing the server files directly.

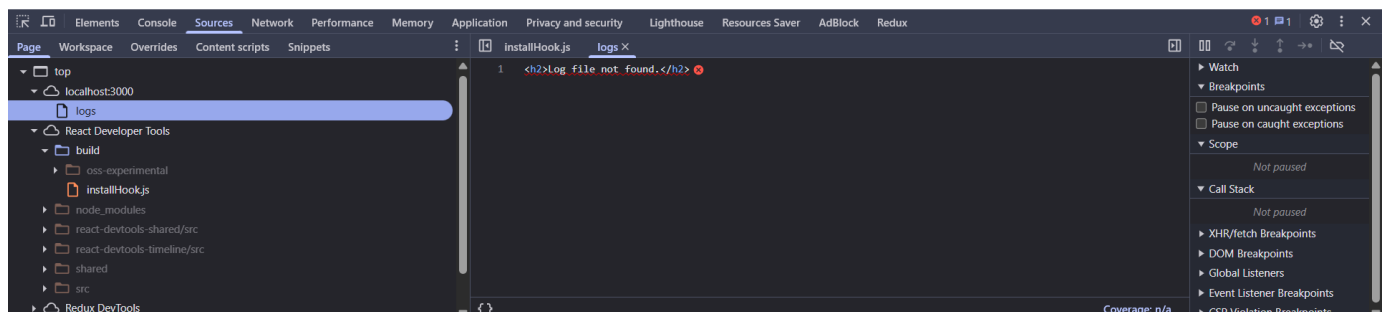

Code

GitHub Repository Link:

<https://github.com/KathanModh259/Full-Stack-Development/tree/master/Practical%2010>

Output

Log file not found.

10.1 Log File Not Found Error
